Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10/12/2005 - 01/25/2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Art Unit: 2141

1. Claims 1-73 are presented for examination.
2. Applicant's election without traverse of claims 1-40 and 55-73 in the reply filed on 10/12/2005 is acknowledged.
3. Applicant is requested to cancel non-elected claims.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

or

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior

to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 14-18, 20-22, 55, and 57-73 are rejected under 35 U.S.C. § 102(e) as being anticipated by Taylor patent no. 6,922,411.

6. As to claim 14, Taylor teaches the invention as claimed, including a system of providing a telephony session requested by a third party, the system including:

a telephony server for calling a first customer, accessing a URL providing a VoiceXML application, running the VoiceXML application when the first customer answers, and responding to an interaction with the first customer during the telephony session, wherein the telephony server configurably receives an incoming call from a second customer (Abstract, col. 4 lines 16 – 52; col. 6 lines 1 – col. 8 line 3; Table 6A-6B in col. 16-17).

7. As to claim 15, Taylor teaches plurality of telephony servers and an event queue interface for monitoring a status of each of the plurality of telephony servers to determine availability for the telephony session (col. 4 lines 53-67; col. 7 lines 8 – 24; col. 23 lines 11 – 40).

8. As to claims 16-18, Taylor teaches an event scheduler for scheduling the telephony session for a predetermined time; means for prioritizing a plurality of telephony sessions; a gateway for receiving a request from the third party to provide the telephony session (col. 9 line 4 – col. 10 line 35).

9. As to claims 20-22, Taylor teaches the event queue interface includes a plurality of event queue servers for receiving a plurality of requests from a plurality of third parties to provide a plurality of telephony sessions; wherein the plurality of event queue servers dispatch the plurality of requests to the plurality of telephony servers based on a semi-randomized selection biased toward low load telephony servers; an accounting interface for capturing a status of the telephony session (col. 9 lines 4-43; col. 23 lines 11 - 40).

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claims 1-13, 19, 23-40, and 56 are rejected under 35 U.S.C. § 103 (a) as being unpatentable over Taylor patent no. 6,922,411, in view of Dermier et al. (Dermier) Patent No. 6,766,007.

12. As to claim 19, Taylor teaches the invention substantially as claimed as discussed above; however, Taylor does not explicitly teach the telephony session request comprises an email.

Dermier teaches initiator of a phone call sends a call-related message to a called person via email (col. 2 line 40 – col. 4 line 14).

It would have been obvious to one of ordinary skill in the Data Processing art at the time of the invention to combine the teachings of Taylor and Dermier to provide the telephony session request in an email because it would allow called person to decide whether to take the call or not based on the call-related information in the email.

13. Claims 1-13, 23-40, 55-73 have similar limitations as claims 14-22; therefore, they are rejected under the same rationale.

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Le H. Luu whose telephone number is 571-272-3884. The examiner can normally be reached on 7:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on 571-272-3880. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
